Description

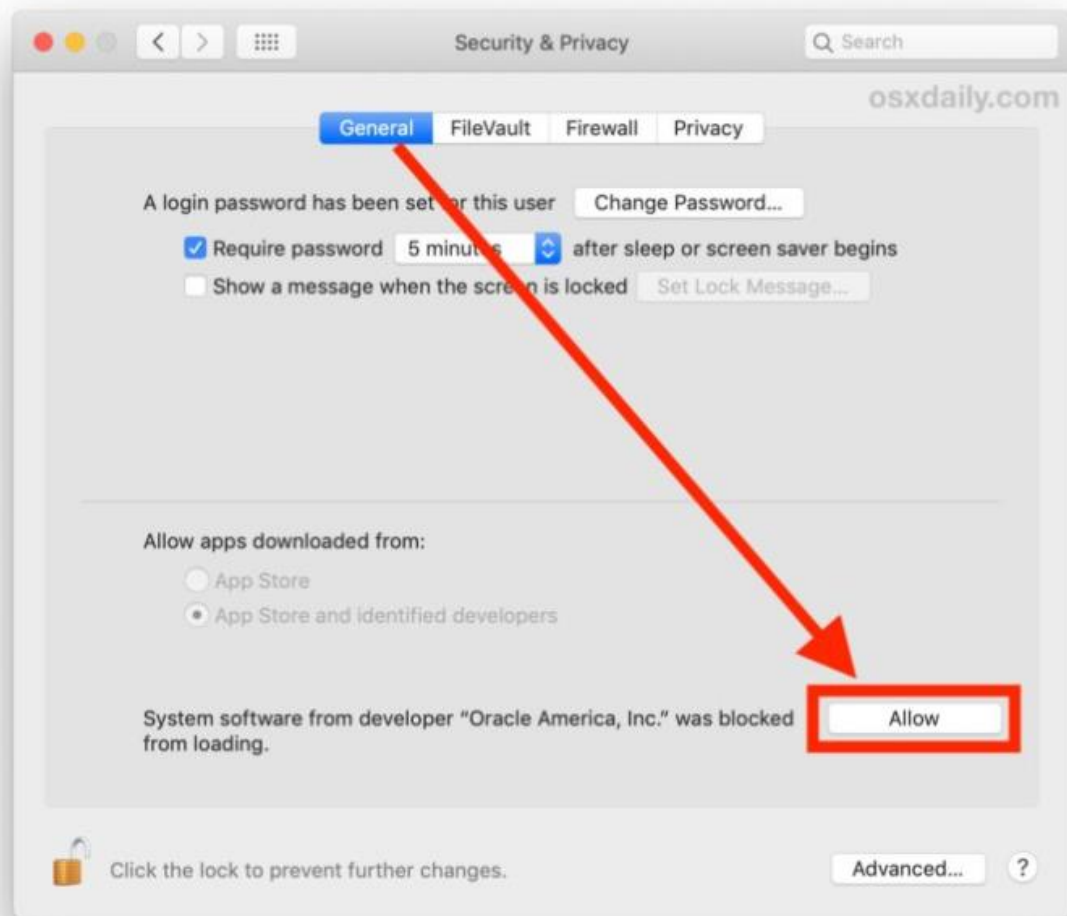

In macOS Mojave these error messages occurs due to a lack of permissions and security restrictions when “Oracle VirtualBox” software is installed.

Workaround

When the warning message appears, quit installer process clicking on [Close] button and follow described steps:

1. Click on Apple icon and go to "System Preferences" section.
2. Select "Security & Privacy" and enter into "General" tab.
3. Click the lock button located in the bottom left corner and type administrator password.
4. Click [Allow] button to unblock Virtual Box installation process.

5. Relaunch installer again and it will be completed successfully.
6. Run VirtualBox software and it will work as expected
